Connecting Excellence

Speech Project Internship, Regensburg

Application development against several State-of-the-Art embedded/mobile and web-based commercial speech technology APIs (e.g., Amazon Alexa Voice Service, Microsoft Windows Speech API, **Microsoft Project Oxford cloud APIs**, ...).

Required skills:

- o Bachelor of Computer Science, Software Engineering, Information Technology, Natural Language Processing or related subjects
- o Interest in State-of-the-Art Speech Technologies
- o Experience with development for mobile devices (Android, iOS, Raspberry Pi, etc.) and/or Web APIs (REST, WebSocket, Node.js)
- o Strong, proven programming skills in one of the following: C/C++, Java, Python
- o Ability to quickly dive into new APIs/SDKs and become productive with them
- o Fluency in English

Preferred skills:

- o Familiarity with Linux/Unix OSs
- o Academic background in Speech Technologies (ASR, TTS, Natural Language Dialogue Systems)
- o Experience with developing against one of the above-mentioned speech technology engines/APIs
